→ Technical Parameter

Lock type	MF card Hotel lock
Unlock way	Mifare S50 card (13.56MHZ) + Mechanical key
Material	Stainless steel both panels+ stainless steel mortise latch+ Alloy Key
Power Supply	4xAA Alkaline battery
Battery life	Around 10000 times (More than one year)
Mortise life	Around 200,000 times
Static Current	<40uA
Door thickness	38-60mm
Working Temp.	-20-55 C
Unlock Record	Record 800pcs recent unlock message
Low Voltage Alarm	5.0V+(0.2V) (lock will remind you to change battery, that time can support atleast 100 times unlocking.)
Working Humidity	16%RH-93%RH
Dynamic Current	≤150mA

Ceto is an hotel door lock designed for easy use and secure access. It supports card and key unlocking, along with PMS integration and energy saver compatibility.This RFID lock is made from stainless steel, it features safety mortise, card loss reporting, and passage mode.Built for long-term durability, it stores up to 800 unlock records and runs on 4 AA batteries.
