YDM3109 (Silver)
Front Body 27(D)X68.6(W)X306.6(H) mm
Back Body 37(D)X72.8(W)X306.6(H) mm

Multiple Access
Yale YDM3109 has three access solutions, PIN Code, RFID card, Key override for your convenience.

Smart Keypad & Operation Status Notification
Keypad can be seen only when you touch the screen with your palm. Whenever any operation is made, the keypad informs you what is happened through different alignment of the numbers.

Fake PIN Code
To prevent the PIN Code from being exposed, it allows you to enter Fake numbers before or after entering your PIN Code.

Missing Card Invalidation
Once you lose your RFID Card, it has no validation as long as you re-register rest of your keys.

Automatic Locking
YDM3109 automatically locks the door after checking it is properly closed. (Manual operation is also available.)

Anti-Panic egress with Safety Handle
For convenience and in case of emergency, the door is automatically unlocked whenever the inner lever handle is used. The safety handle will prevent children or large pets mistakenly open the door.

Mechanical Key Override
For emergency, it can also be unlocked with a mechanical key.

Alarm (Break/Damage)
80dB alarm goes off if anyone attempts to damage the lock or force the door open.

Low Battery and Emergency Power
It warns in case of low battery with alarm and LED. When the batteries are completely discharged, you can easily supply emergency power to the lock with the standard 9V battery.

Remote Control (Optional)
Remote control type is also available. Wireless Floating ID technology is adopted and works up to 50m.
